the-dreamhome.com – Furniture is an important thing to beautify the home. by providing appropriate furniture that will surely beautify the home atmosphere. the chair is one of the important furniture in delivering beautiful and elegant impression in a room. to have a minimalist house seats will look more neat and beautiful.

The Magic Chair comes from designer Davide Conti and seems to only stand on one foot. This optical illusion is made possible due to a transparent material which is used to help maintain the balance of the chair. But since this material is almost invisible, when looking at this product from a certain angle, the user will surprisingly only see a bunch of straight thin lines. Despite its fragile appearance, this chair is very durable and strong. Moreover, it is a very original piece of furniture to have around.
