

Magica Chair, cadeira minimalista que desafia a gravidade

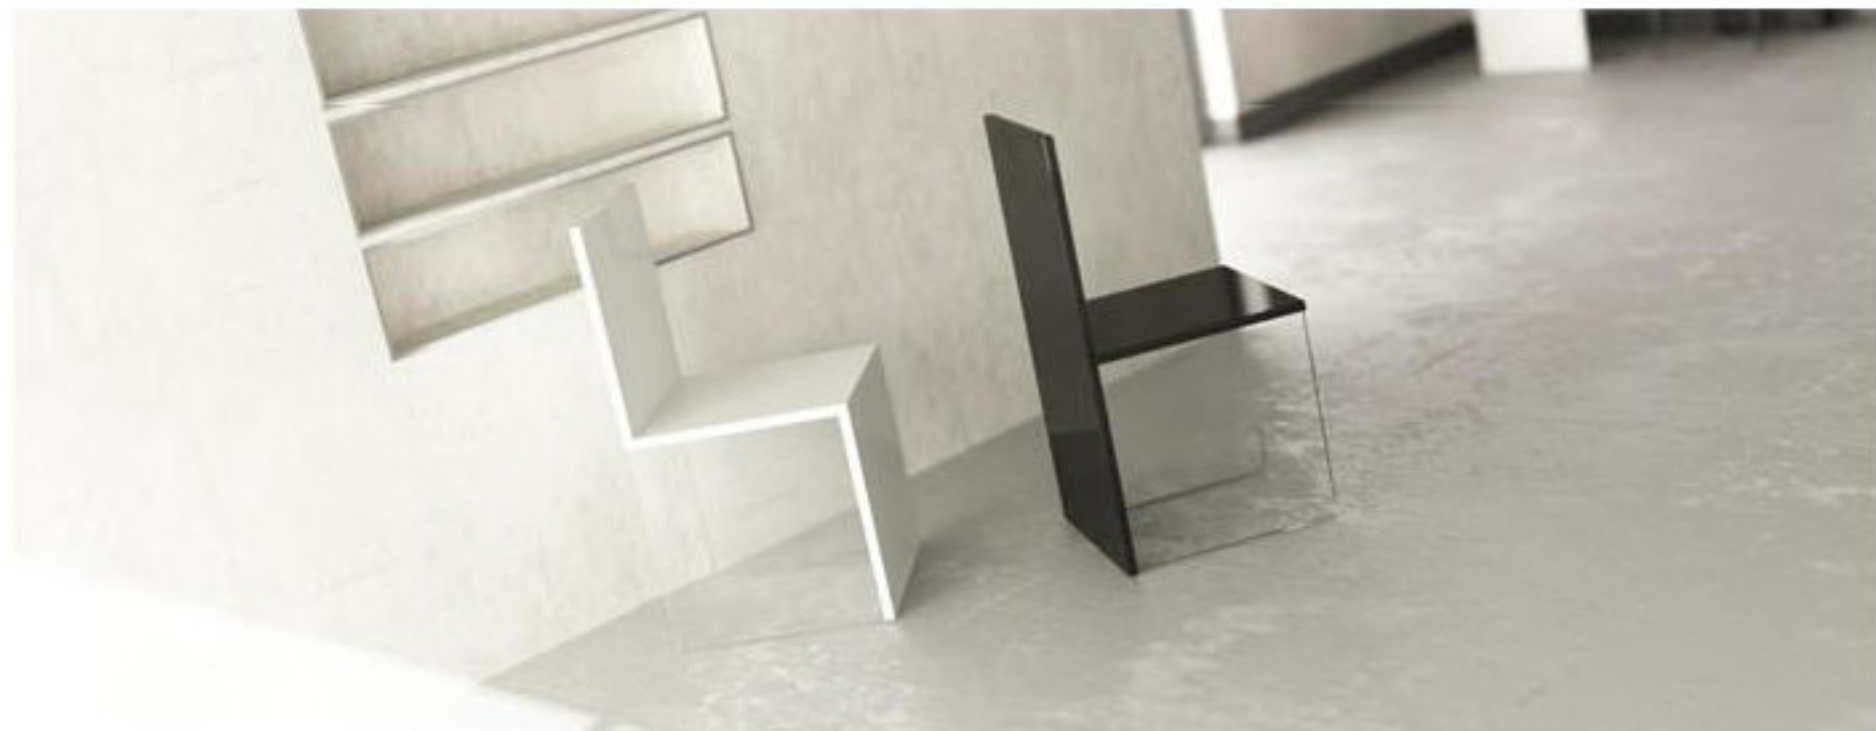

Publicado em:
5 de outubro de 2013

Categorias
Luxo, Mobiliário

A Magica 1 e Magica2 são duas modernas cadeiras criadas pelo designer italiano [Davide Conti](#). O design minimalista, baseado em conceitos simples de precisão e linhas bem definidas, parece desafiar a gravidade. É uma ilusão momentânea, que nos leva a prestar atenção às linhas fortes e rígidas do desenho das cadeiras.

À primeira vista, as peças parecem frágeis. No entanto, são leves e fortes. Cada cadeira é fabricada inteiramente com Plexiglas, material com características muito parecidas com o acrílico, mas com maior resistência a altas pressões e transparência que não distorce imagens.

Lindas, não?

The Most Unique Chair with Minimalist Design by Davide Conti

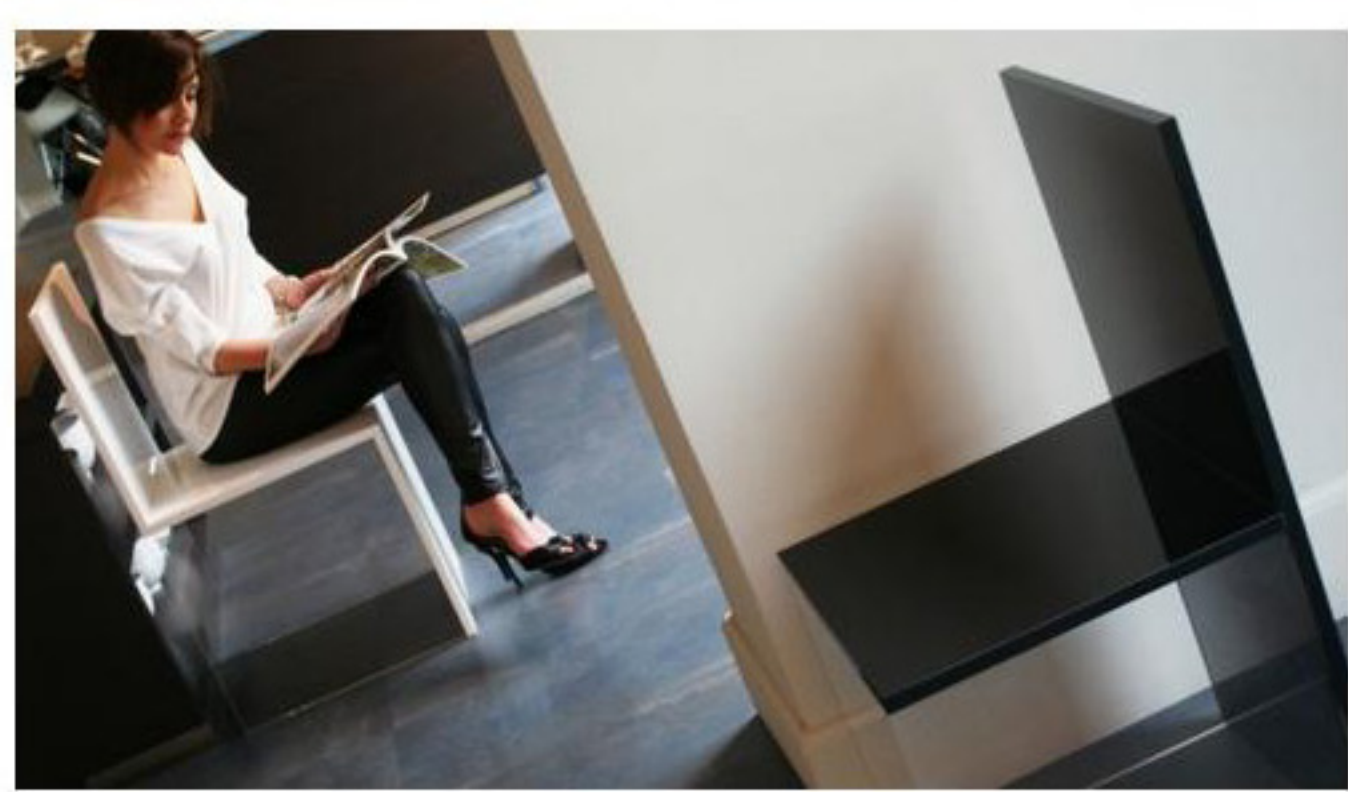

Posted on [September 24, 2013](#) | [Leave a comment](#)

Italian designer [Davide Conti](#) has created **the most unique chair with minimalist design** called the [Magica and Magica2](#). The chairs have a very minimalist appearance and looks like defy gravity. When viewed at a glance it looks very strange and unique, but upon closer inspection, you realize they are outfitted with clear methacrylate (plexiglas).

These two sisters, “Magica” and “Magica2, are based on strong and clear concepts: simplicity, basic lines and accuracy. Two ultra-minimal chairs comes to light thanks to a hidden but intense research. The “Magica” chairs want to astonish with their minimalism and illusion: a momentary but effective illusion that strenghten and emphasize its strong lines.

They are entirely made in coloured and clear methacrylate (plexiglas), which enhances their identity and reinforces their spirit, defined by strenght and timeless elegance. In 2010 “Magica” and “Magica2” win the third edition of the “Furniture Design Competition” international contest, published by Design Quest.The chairs are produced by [Bizarline](#) in Alcamo, Italy.
